Welcome!

BUILDING BLOCKS *for success*

The Traxinger Family, pictured, back, L to R Brittney, Brandon, Jerry and Michael, (front) Mike, Ryker, Rylee and Terri

Traxinger Simmental will host their annual sale on February 12th at 1:PM.

Please accept this as your personal invitation to join us that day to talk cattle, BS and just enjoy the gathering of fellow cattlemen. Yes, its bull sale for us, but in our busy world it's also a time to see old friends and to make new ones.

This year's offering is similar to other years. Again we'll offer 50 bulls reds and black, most are homo-polled and blks are all tested for homo black too. Throughout the years we have NEVER increased the number of bulls in our offering, even though we have grown our cow herd. Simple answer—it creates higher quality bulls for your selection.

This year we have tested every bull through the ASA Calf Crop Genomics program with DNA. The GGP-LD genomics test verifies parentage and gives you enhanced EPD's. What this means is through the DNA they can improve the accuracy on certain traits. According to ASA it's like having 10 to 25 calves out of that bull already. It has its good points and breeders in general have started to demand that they be DNA.

I've said this the last 3 years that we need to cut back and figure out a way to trim the number of cows we run. I'm passionate about our cow herd which is a life time (54 yrs breeding Simmental) in the making. But I also realize my age is preventing me from going hard and doing all the physical work necessary. My family has filled those spaces and have been great. They have sacrificed their time on weekends and holidays to work cattle, well that gets old dad, yes it does. Our thoughts are to sell down on cows this fall by private treaty. So, if interested in our herd, please contact us.

Remember--Feb.12th 1PM at the farm for our 2025 bull sale. Stop in and view the bull before the sale.

DV Auction will assist us and their support group can be reached at 402-316-5460. If you have any questions please visit with them prior to the sale and familiarize yourself with the process. This does require high speed internet.

We need to thank all those people who have been customers, friends, neighbors or a part of our lives in some form or another. The cattle are the connection but the friendships that we have made in our lifetime are the GREAT REWARDS of doing this.

Thank-You

COLOR & POLLED GUIDE

Homozygous Black - All calves will be black if mated to a black or non-dilutor red cow.

Heterozygous Black - If mated to a non-dilutor red cow $\frac{1}{2}$ the calves will be black and $\frac{1}{2}$ will be red.

Homozygous Polled - All calves will be polled.

Heterozygous Polled - If mated to a horned cow $\frac{1}{2}$ of the calves will be polled and $\frac{1}{2}$ will be horned.

Non-Dilutor - If mated to a heterozygous black cow, $\frac{1}{2}$ the calves will be black and $\frac{1}{2}$ will be red. If mated to a homozygous black cow, all calves will be black.

Dilutor - If mated to black cow, you might get a grey calf.

IMPORTANT NOTES:

- Feeding arrangements available.
- Delivery options available.
- All cattle sell under the standard terms and conditions of the American Simmental Association. Available upon request. At no time shall Traxinger Simmentals be responsible for more than the purchase price of the animal.
- We will be selling 100% possession and reserve the right to retain 1/3 semen interest on all bulls selling, with the option to collect 100 units for in-herd use only. This will be done at the seller's expense and the buyer's convenience. Please contact me if you have any questions.
- Traxinger Simmentals will not be responsible for any lost or stolen items or liable for any personal injury.
- An Insurance Representative will be available on sale day. We strongly encourage the buyer's to take insurance at least through the first breeding season. Full liability is assumed by the buyer when the gavel falls. Traxinger Simmentals is not responsible for injury or accidental death.
- Complimentary lunch will be served beginning at noon.

Homo-Polled Nondilutor. This red boy doesn't have any holes. He's moderate in size but his strong top and hind quarter are big assets. Another great ratioing calf, BW 105, WW 885 to be the 2nd highest WW out of 62 head. First calf heifer with power genetics behind her, WW ratio of 118.

Use Traxinger Bulls for added pounds at weaning time!

We have been long time buyers at Traxinger Simmental's annual bull sale. Mike's goal is never just to sell us a bull, but to add pounds to our calves at the sale barn. He also encouraged us to retain more of our heifers to retain some of the genetics in our female herd from the bulls we bought.

Buying bulls from Traxinger Simmental has resulted in our calves' weaning weights and rate of gains significantly increasing! We started calving on April 4, 2024 and sold our calves on December 16, 2024. The calves did not have any implants. They were a pot load with an average 226 days, weighing 841 lbs.

- Dennis and Jeanie Angerland - Langford, South Dakota

Homo-Polled Nondilutor. The first red calf out of our cherry red heifer bull DCR Killian. M90 comes from a very strong cow family tracing back to Michael's G917 cow. He is a complete stud, thick deep quarter, strong topped and just easy to look at. Again very impressive ratios BW-105, WW 118 with actual of 890 to be the 3rd highest out of 62. Out of a first calf heifer again.

Homo-Polled Nondilutor. Another Red Rock out of a powerful first calf Trax's Bulldog daughter. Look at these growth EPDs ratios #1 for WW YW ADG and TI and 3rd for REA. Definitely a pound maker. My birth weights will ratio above 100 but my WW will too. A 70 lb calf at birth is considered small for my heifers. Dams ratio on her first calf is 117 with actual ww of 880lbs. M89 ratioed 4th out of 62 at weaning.

Homo-Polled Nondilutor. STUD- best describes this guy. He has the muscle pattern to create some great offspring, complete. M88 is number 1 for WW at 920 lbs actual to ratio 119. He's just a thick stout, big bull from one end to the other. All the bulls have genomically enhanced EPDs this year so if you trust the numbers his growth traits are off the chart. Herd bull potential.

Homo-Polled Homo-Black. Innovator was a bull we bought from Dr Allan, Wayward Hills Farm. Stout and a 6 frame and that's how his calves are. The right type and kind we like but in a moderate package. When mated to our power cows we ended up with some impressive calves. M78 ratioed 111 at weaning and ranked 11/62. Dams ratios 111 WW. Oh, she's a first calf heifer too.

Homo-Polled Homo-Black. One of the several ET calves out of Art Miss E720. With ET calves they stand alone with no ratios to litter mates. Lots M70 M67, M62, M56, and M51 are all litter mates. ET calves can vary in type and kind and this flush shows that. M71 is a calf that when pressed can get nervous, not bad but noticable.

TRAX M71

Art Miss E720 • Donor Dam of Several Lots in this Sale

**Increase
uniformity
in your
calf crop
with a
Traxinger
bull!**

We have been buying bulls from the Traxinger Family for approximately 13 years. Every year the calf quality continues to improve. The calves have the frame, length, and gainability, which are very important factors in a commercial herd like ours. We started calving on April 1, 2024 and sold our calves on January 4, 2025. We sold 49 steers and 44 were sold in one group weighing 845 lbs. each. We sold 54 heifers and 45 were sold in one group weighing 771 lbs. each. Uniformity is key in any operation, but it is especially important in ours. What was more gratifying than the market price for the calves was the three order buyers that came up to me after the calves sold and commented how nice the calves were. It is nice to be reassured that the calves we are selling and the genetics we are using are being acknowledged.

*- Mike and Tracy Culler
Aberdeen, South Dakota*

Homo-Polled Homo-Black. When we did a IVF flush on Art Miss E720 cow she dumped out 110 ocytes to produce 58 embryos. So with 110 ocytes we used 4 different bulls and that's the reason we have so many different matings and several sons. This guy is out of Right Now and his muscle pattern is different than some of the other matings. He's good stout and moderate framed.

Homo-Polled Homo-Black. Different mating on the E720 cow here, KBHR Bold Ruler. This guy is a taller longer bodied bull compared to the other flush sibs out of E720. Amazing the difference there can be with these ET calves. Mother nature is still in charge even if we think we know what we're doing. We have a vision when we mate these cows, truth is most of the time reality isn't what we envisioned.

Homo-Polled Nondilutor. Litter mate to M54 only this one is red out of Miss Trax's B479. This cow has left us with numerous daughters that will be the heart of our program as we go forward. These Lover Boy offspring carry the muscle pattern and performance that the Simmental breed has lost. Check out his numbers, he's got it.

Homo-Polled Nondilutor. One of the few Trax's Bulldog calves in the offering. Tremendous muscle pattern, dark red and stout. His dam is one of Michael's best red cows and has been on the list of cows we need to flush. This is the first bull calf she has had and we just sold her daughter (Trax's Captivate L362) at the NDSC for \$11,000 to Joe Hartzel of Ohio. The dams ratios are WW 110 YW 107. Plus she still has a picture udder at 8yrs. We call these females our homerun girls.

Hetero-Polled Nondilutor. EPD traits with 10 in the top 25%, got to use them as a tool for selection but this calf still has to grab your attention. The M34 calf does that, dark cherry red with a great profile, deep thick and soggy. Again a dam that's making some waves in our program with impressive ratios of BW 101, WW 112 and YW of 108.

I'm at the age where these cows should go but when females like these appear I can't wait to see what she does next year.

Homo-Polled Hetro-Black. BWF calf that just keeps getting better. Just walked out in the pen to look for another calf and this guy caught my eye. Just enough white on his face to grab ya, but study his hind quarter and top line and you'll really appreciate him. I know he's hetro blk but just imagine if he is used on a handful of hetro blk cows and you create a rwf. He's flashy enough to create offspring that will be noticed. His dam has done well with ratios of BW 94, 102 WW and 105 YW.

Homo-Polled Homo-Black. I believe he is the only Rode's Powerhouse calf in the sale. We used Powerhouse mainly to get more performance. His dam, Miss Art E720 is the mother to most of the black ET calves in the sale. Powerhouse himself had an Adj of 901 lbs and YW of 1444 and at that time this was E720 was a first calf heifer. M27 himself looks a lot like Powerhouse. His Black Diamond dam has ratios of BW 101 WW 103 YW 105 and that's on 8 calves. Power on both sides of the young guy.

Homo-Polled Homo-Black. We bought a Genesis son out of Nate Rubys great Linda cow. He was used as clean-up after AI so didn't many calves. The few calves we have are good. This is the youngest calf in the sale 4/29/2024, there is a reason we left him as a bull. He's maturing into a big fellow and his performance is impressive. His WW 869 lbs. with a ratio of 116, he ranked 5th out of 62 in his group. His dam has done her job too with ratios of WW 107, YW 105, that's how we like them.
